

Data Protection & GDPR

DS PARTNERS
LAW FIRM

Data Protection & GDPR

In the ever-evolving digital world we live in, data is more than just a reference or a consent – it is a very personal and valuable asset. We understand that using and protecting such information properly has never been more vital.

Our firm's lawyers possess the skills, knowledge and expertise to assist our clients throughout the GDPR and data protection life-cycle, helping you navigate through the complex landscape of compliance and untangling the red tape on your behalf.

SERVICES WE CAN OFFER

Rapid Maturity Assessment

- Review of the data policies and/or procedures currently in place;
- Quick assessment of data processing operations & risk identification based on GDPR/data protection laws;
- High-level Data Flow Mapping;
- Design of personal data flows.

GDPR GAP Assessment

- Review of legal documentation on existing processes and oversight;
- Identification of 3rd parties as joint data controllers/processors and assessment/review of Data Processing Agreements;
- Effectiveness and accuracy assessment of the control design of privacy requirements;
- Identification of possible non-compliance gaps in line with data protection legislation, privacy best practices and industry standards.

Roadmap Greenlight

- Implementation timeline, based on EU and local laws and directives;
- Review of governance model and management processes;
- Review, design and implementation of GDPR governance framework.

Remediation Roadmap & Implementation

- Implementation of proposed GDPR/Data Protection programme;
- Review and/or drafting of required documentation on data processing procedures;
- Preparation of Guidelines, Manuals & other procedures to be adopted.

Monitoring & Compliance

- Ongoing monitoring and maintenance of the data protection compliance programme;
- Periodical assessment of compliance in line with current legal requirements;
- Address and implement remediation activities where required (including updating of documentation);
- Establishment of the Data Protection Office.

Appointment as Data Protection Officer (DPO)

- We can be appointed as DPO on an annual retainer basis and/or provide in-house DPO support services on a retainer or ad-hoc basis.

We collaborate with experts in the technology industry to provide our clients with a holistic service offering.

Our collaborators offer technological expertise, operational and advisory services in operating models, metrics, governance, and policies to manage data and privacy risk while empowering business growth.
